PROFESSIONAL OVERVIEW

Dynamic professional with a proven track record working with both small clients and large companies. Excels in modern web development, data analysis and team leadership, with a particular strength in mentoring and driving performance improvements through comprehensive reporting and strategic task delegation. Skilled in modern web technologies and fast pace SaaS environments, fostering collaboration to achieve operational excellence.

WORK EXPERIENCE

Full Stack Web Developer

Self-Employed | 2024- Present

- Developed custom web applications and websites for small businesses and non-profits using modern JavaScript frameworks including React and Node.js
- Collaborated directly with clients to gather requirements, provide technical consultation, and deliver solutions that meet their specific business needs
- Implemented responsive design principles and API integrations to create dynamic, user-friendly web experiences
- Managed full project lifecycle from initial planning and development through deployment and ongoing maintenance

Engineering Operations Associate

Promoted to Senior Engineering Operations Associate 2023

Waymo through Cognizant | 09/2021 to 11/2024

- Provided technical leadership to the engineering operations team by mentoring junior associates and leading performance reviews
- Delegated tasks to team members on a daily basis to ensure project efficiency and timely completion
- Prepared comprehensive weekly summaries of diverse performance indicators, driving data-informed improvements
- Analyzed internal performance metrics to identify recurring issues and operational trends, contributing to process improvements and root-cause prevention
- developed and delivered clear, data-driven reports for software engineering teams to support incident resolution and system optimization

PROJECTS

Full Stack Website Deployment

www.maxbauerw.com | elff.com | 2024

Built and launched fully functional websites for nonprofits and small businesses, featuring clean, responsive UI/UX, integrated APIs for authentication and donations, and direct email messaging capabilities.

PlayUp

Spotify API | 2025

Lightweight Web App for automatically generating unique playlists based on user history. Built using React and TypeScript. Fully integrated with Spotify API.
